SKILLS

Team Management, Database Management, Python, Java, C#, HTML, Work Processing, Software Development, Machine Learning, PHP, Mysql, Postgresql, Quality Assurance, JIRA, ClickUp, LLM, Data Science

EDUCATION

Bachelor of Science in Computer Science

2026

University of Makati

PROJECTS

WorkAble | Python, NumPy, SentenceTransformer, SVD, Postgresql **April 2025 - April 2026**

a web-based job recommendation system for Persons with Disabilities (PWDs) in Taguig City in partnership with the PDAO and PESO, utilizing a hybrid recommendation algorithm to improve job matching based on applicant profiles, preferences, and qualifications.

- Led the development team by assigning tasks, setting deadlines, and ensuring completion of deliverables every sprint and timely project completion.
- Analyzed client requirements and coordinated with PDAO and PESO to align the system deliverables with stakeholder needs and interpret it to developers.
- Developed a hybrid job recommendation engine using **Python, Sentence Transformer, SVD, and NumPy** to deliver the major feature of our system.

iServeComembo | Python, flask, pandas, flutter flow, firebase **August 2024 - June 2025**

a local government mobile application for Taguig City that digitizes barangay services by enabling residents to request documents, report community concerns, and access barangay announcements and news through a centralized information system.

- Coordinated with barangay administrators to gather requirements, validate system deliverables, and ensure the application aligned with their operational needs.
- Developed a sentiment analysis feature using **Python, Pandas, and Flask** to automatically classify resident reports and prioritize urgent community concerns.
- Performed functional and non-functional testing with proper documentation to identify, track, and manage system bugs and issues.

EXPERIENCE

Project Manager Intern, Certicode

February 2026 - May 2026

- Managed project timelines and coordinated multiple development teams to ensure that tasks were completed on schedule and aligned with project objectives
- Monitored frontend and backend development using tools such as **React JS, PHP, MySQL**, and **GitHub** to ensure system functionality, progress, and quality assurance
- Conducted regular meetings, evaluated team performance, and provided constructive feedback to improve collaboration, productivity, and task efficiency
- Reviewed system designs, identified bugs, and analyzed workflows using Figma and Lucidchart to enhance system usability, accuracy, and overall project quality

AWARDS/RECOGNITIONS/VOLUNTEER WORK

- IT Specialist - Database **2025**
- Cum Laude **2026**
